MUN Procedures

- Committee Session
    1) Roll Call
        - All countries called, delegate responds with “Present” or “Present and Voting”
    2) General Speaker’s List
        - Chosen delegates give opening speech
    3) Moderated Caucus
        - Speaking rules apply
    4) Unmoderated Caucus
        - Informal session, delegates can walk around and talk to other delegates
    5) Drafted Resolutions
        - Done with multiple delegates
    6) Voting
        - Delegates vote for best resolution

MUN Terminology

- Moderated Caucus
    - Short statements/comments from delegates on sub-issues
    - If someone wants to speak on the subject, they must raise their placard and wait for the chair to call on them
- Unmoderated Caucus
    - Free movement
    - Talk to other delegates
    - Form alliances
    - Brainstorm resolutions

- Floor
    - Opportunity to speak
- Motion
    - Suggest an action
        - Extend debate time
        - Vote on resolutions
- Second
    - Agree with another delegate's motion
- Objection
    - Disagree with another delegate's motion
- Abstain
    - If a delegate is unsure about their vote they can choose not to say yes or no definitively
        - Does not fully agree
        - Agrees enough not to vote against
- Veto
    - Ability held by: China, France, The Russian Federation, The UK, and The US
    - Prevents adoption of any substantive resolution

MUN Points

- Question or suggestion made by a delegate to the chair
- Usually regarding their comfort
- Types of points :
    - Point of Order
        - Objection to a procedure
        - The chair has made a mistake
        - Parliamentary Procedures are not done correctly

        - Must be made
        - Must say point of order whilst raising their placard
        - May interrupt a speaker who has the floor
    - Point of Inquiry
        - For clarification
    - Point of Information
        - To add onto another speaker statement/resolution
        - To bring down the resolution
        - Must be formulated as a short question
        - May NOT interrupt speaker who has the floor
        - Must be directed to the chair, even though it is aimed at the speaker
        - Max 2 times
    - Point of Personal Privilege
        - When a delegate feels uncomfortable
        - Room too hot / too cold
        - May interrupt speaker to request for change in atmosphere
    - Point of Parliament Inquiry
        - Point of info directed at chair regarding the rules of procedure

Geographical/Environmental

- Where?
    - Central America
- Type of land
- State of the environment (air quality, trash, etc.)
- Temperatures
- Bordering countries
- Influence of bordering/regional countries

Cultural/Societal

- Population
- Culture
- Food
- Language
- Quality of Life
- Quality of Education
- Equality
- Safety
- Violence
- Demographic Transition Model Stage

Economic

- Influences of the government
- Influences on the government
- Corruption
- Legal system

Significant Historical Events

- War
- Significant population growth or decline
- Change in government
- Protests
- Major crimes
- International involvement

Nicaragua is located in Central America, with Honduras to the north and Costa Rica to the south. It also has two coastlines belonging to two different seas, the Pacific Ocean to the west and the Carribbean Sea to the east.

What policies does Nicaragua have for combatting synthetic drug production and trafficking?

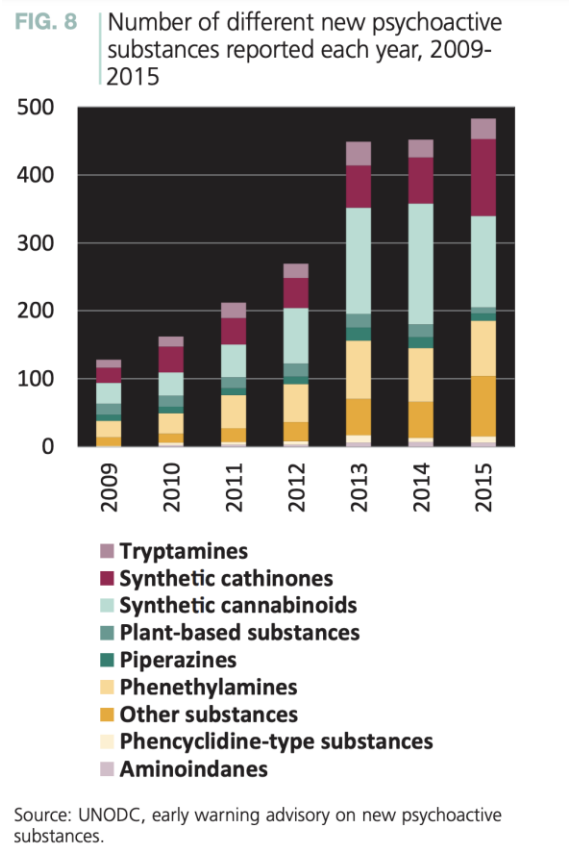
(Article 37 of Decree No. 6-99).

- Nicaragua seems to have conflated its three lists (narcotic drugs, psychotropic substances, and precursor chemicals) into a single list of precursors
    - Narcotics
        - -
    - Psychotropic
        - -
    - Precursor chemicals
        - -

- Nicaragua's 2010 Law for the Prevention, Investigation, and Persecution of Organized Crime and the Administration of Seized Assets defines narcotic and psychotropic drugs by incorporating the 1961, 1971, and 1988 UN Conventions and 1972 Protocol and also authorizes the Ministry of Health to regulate these definitions. The law also comprehends precursor chemicals.

- The Ministry of Health created schedules in Article 37 of Decree No. 6 of 1999, as authorized by Article 50 of the Law on Medications and Pharmacies, a chemical precursors provision. As noted above, Article 37 contains both precursors and "complete" drugs. The Ministry regularly adds substances via Ministerial Resolution, such as: ANPP and NPP on 9 April 2018 via Res. No. 168-2018 and ketamine on 6 February 2009 via Res. No. 18-2009.

- Government websites may not provide complete, searchable access to the country's statutes, ministerial decrees, and other relevant documents.



Data analysis - new psychoactive substances reported

- 2009 - aprox. 130
    - +40
- 2010 - aprox. 170
    - +40
- 2011 - aprox. 210
    - +70
- 2012 - aprox. 280
    - + 170
- 2013 - aprox. 450
    - +10
- 2014 - aprox. 460
    - +30
- 2015 - aprox. 490

6-year span - difference = +360 (270% of initial stat)

The UNODC Global Drugs Assesment (from 2017) shows the increase in annual reports of new psychoactive substances over a 6 year period to be around 270%, resulting in approximately 500 new psychoactive substance reports as of 2015.

Opening Speech 1 - Synthetic Drugs

Honorable Chairs and Fellow Delegates,

In 2022, the US reported over 100,000 deaths that were caused by synthetic drug overdoses. The UNODC revealed that rougly 500 new synthetic substances are discovered each day. Without UNODC intervention, this problem will only worsen, leading to more deaths.

The delegation of Nicaragua is strongly against the production and trafficking of synthetic drugs. Nicaragua proposes a solution based around law enforcement and international agreements.

Within this agreement, all UNODC nations must comply with the following rules and regulations: restricted sales of precursor chemicals, new customs policies, new instant substance identification technology, life-saving medicine for synthetic drug overdoses, and lastly, implementing K9 units for high-risk regions.

Together, we can find a way to regulate substances permanently and globally.

The delegation of Nicaragua yields the floor back to the chairs.

—----------

AI revised speech :

Revised Speech Example

Honorable Chairs and Fellow Delegates,

As we gather today, the world faces a grave challenge: the escalating threat of synthetic drugs. In 2022, the U.S. reported over 107,000 drug overdose deaths, with synthetic opioids like fentanyl being a major contributor[1][2]. Globally, the number of new psychoactive substances has surged, posing significant risks to public health[3].

The delegation of Nicaragua strongly opposes the production and trafficking of synthetic drugs. To address this issue, we propose a comprehensive framework:

- ***Restricted Sales of Precursor Chemicals**: Implement strict controls on the sale of chemicals used in synthetic drug production.*
- ***New Customs Policies**: Develop standardized customs procedures to detect and deter drug trafficking.*
- ***Instant Substance Identification Technology**: Deploy advanced technology to quickly identify substances at borders.*

- ***K9 Units in High-Risk Areas****: Utilize trained dogs to enhance detection capabilities in key trafficking routes.*

We urge all UNODC nations to collaborate on these measures. Together, we can combat this menace effectively. Let us work towards a safer future for all.

The delegation of Nicaragua yields the floor back to the chairs.

Feel free to adjust this based on your specific needs and goals for the speech!

Opening Speech 2 - Illegal Online Pharmacies

Honorable Chairs and Fellow Delegates, the alliance for safe online pharmacies (ASOP) have warned, in a 2021 survey report that roughly 95% of all online pharmacies are operated illegally.

The biggest risk posed by illegal online pharmacies is counterfeit pills – particularly those that are laced with various illicit substances.

The delegation of Nicaragua stands against the processes of illegal online pharmacies, however it should be noted that like many nations, the regulations around pharmaceuticals and pharmacies are not updated to consider the extensive possibilities of online based pharmacies.

In order to resolve this issue, the delegation of Nicaragua suggests a plan of action including; web domain regulation and registration, targeting and shutting down payment methods used by illegal online pharmacies, and banning the shipping/transport to and from unverified online pharmacies.

The delegation of Nicaragua yields the floor back to the chairs.

—----------

AI revised speech :

Revised Speech Example

Honorable Chairs and Fellow Delegates,

Today, we face a pressing challenge: the proliferation of illegal online pharmacies. A 2021 survey by the Alliance for Safe Online Pharmacies (ASOP) revealed that approximately 95% of online pharmacies operate illegally. This poses a significant risk, particularly through counterfeit pills laced with illicit substances.

The delegation of Nicaragua strongly opposes the operations of illegal online pharmacies. However, we acknowledge that many nations, including our own, face challenges in updating regulations to address the complexities of online pharmacies.

To address this issue, we propose the following plan:

- ***Web Domain Regulation and Registration**: Implement strict registration and oversight of online pharmacy domains to prevent illegal operations.*
- ***Targeting Payment Methods**: Collaborate with financial institutions to identify and shut down payment channels used by illegal pharmacies.*
- ***Shipping Restrictions**: Prohibit shipments to and from unverified online pharmacies to prevent the distribution of counterfeit drugs.*

We urge all nations to join us in this effort. Together, we can protect public health and ensure safe access to medications.

The delegation of Nicaragua yields the floor back to the chairs.

Feel free to adjust this based on your specific needs and goals for the speech!

- regulating the production and distribution of precursor chemicals (already in progress in south east asia)
    - finding the sourcers
    - requires a government issued lisence to possess and/or buy and sell

- educating border/customs control and providing equipment/training to identify incoming substances and seize them (if necessary)
    - technological innovations - under a minute substance identification/testing
    - sniffer dogs at border control
    - proof of testing/substance identification

- regular updates on regulated substance lists
    - mandatory annual revisions - done per region)
    - regulated substances listed in accessible and purposeful places

- international agreements (especially within regions)
    - agree to annual revisions
    - agree to implement government/un funded rehab programs (in major cities/high risk places)
    - agree that substances (over 5kg in volume) transported internationally must come with proof of testing approved by both the exporting and importing countries (especially in high risk countries)

- increase security of postal services to minimise the trafficking via these processes
    - x-ray processes mandatory for all international mail
    - background checks for suspicious sender info

- access to rehab
    - government funded
    - rehab instead of imprisonment
    - easy to find info on rehabs

- centers for safer drug use
    - access to clean needles
    - access to immediate medical care
    - access to rehab resources
    - access to substance testing tools
    - access to psychotherapy
    -

- better public understanding (less stigma)
    - government issued articles and/or programs that aim to educate people on the reality of drug use and addiction

- rehab processes backed by science
    - step by step programs proven as successful by psychiatrists and drug experts

- creating live-saving emergency responses (that can be easily adapted for a wide variety of synthetic drugs)
    - naloxone for synthetic drugs (works against the most common precursor chemicals)

- digital monitoring - ways of regulating the dark web?
    - immediate deletion of websites selling prescription medication without an official government-approved url

- annually updated regulated substance list
    - unodc collab
    - targets precursor & active ingredients as opposed to the specific substance

- making synthetic drugs safe instead of banning them
    - synthetic drugs have the potential to be more effective without the health risks
    - finding a way to redirect the targetted brain receptors
    - these can be safer than recreational drugs

- hospitals to home
    - verified hospitals transport medication to the homes
    -

Opening Speech 1 - Synthetic Drugs

Honorable Chairs and Fellow Delegates,

In 2022, the US reported over 100,000 deaths that were caused by synthetic drug overdoses. The UNODC revealed that roughly 500 new synthetic substances are discovered each day.

The delegation of Nicaragua is strongly against the production and trafficking of synthetic drugs. Nicaragua proposes a solution based around law enforcement and international agreements.

Within this agreement, all UNODC nations must comply with the following rules and regulations: restricted sales of precursor chemicals, new customs policies, new instant substance identification technology, and lastly, implementing K9 units for high-risk reigons.

Together, we can find a way to regulate substances permanently and globally.

The delegation of Nicaragua yields the floor back to the chairs.

—----------

Position Paper 1 - Synthetic Drugs

Honorable Chairs and Fellow Delegates,

Unlike other drug epidemics, synthetic drugs are extremely lethal and are one of the biggest contributors to drug overdoses. So, why haven't we banned the production of these drugs? We can't. There is no way to write a law that targets all "synthetic drugs" without banning necessary medication.

The delegation of Nicaragua urges all UNODC nations to come together and form a plan to enforce restrictions, reduce the presence of synthetic drugs, and save lives.

Nicaragua is determined to de-escalate the synthetic drug epidemic and move toward a world where drugs aren't deadly. To do this, our committee must consider opposing factors as well as unsuccessful strategies.

This plan consists of legal and technological policies and suggestions such as;

- ***Restricted sales of precursor chemicals:*** International laws that require a government-issued license to produce, sell, or possess the most common precursor chemicals.

- ***Comprehensive Customs policies:*** Certain quantities of any substance must be tested and officially identified before being brought into another country. The document to confirm testing must be shown at Customs.

- ***Development and implementation of instant substance recognition technology:*** Creating/improving technology that allows any substance to be tested instantly to minimize reliance on border control/customs knowledge.

- ***K9 Units:*** K9 units trained for drug identification stationed at borders of high-risk regions and/or along popular trafficking routes.

Border and customs policies are likely to be beneficial for North and South America specifically, as Nicaragua is a major cross-shipment point for drug trafficking between North and South America.

While doing so, we must ensure that trade as a whole is kept free - Nicaragua especially is reliant on foreign trade that passes through its borders and seaports, and despite our precarious positioning within this drug-ridden part of the world, we must maintain our channels of trade, by and by large, unregulated.

We can adapt together with clear guidelines and a strong presence of law enforcement without sacrificing on international trade. Let’s build an overdose-free world.

—----------

Ai revision

Honorable Chairs and Fellow Delegates,

The delegation of Nicaragua's position on addressing the synthetic drug epidemic is commendable and timely. Recent data underscores the urgency of this issue, with synthetic opioids involved in an estimated 87% of opioid deaths and 65% of all drug overdose deaths as of June 2021[1]. The proposed plan addresses crucial aspects of the crisis, but let's examine it in light of the most recent developments and global trends.

Current Situation

As of 2022, synthetic opioids, particularly fentanyl, were responsible for approximately 71,000 drug overdose deaths in the United States alone[2]. However, there is encouraging news: provisional data from the CDC indicates a significant decline in drug overdose deaths in the United States, with a nearly 24% decrease reported for the 12 months ending in September 2024[7]. This positive trend demonstrates that concerted efforts can indeed make a difference.

Evaluation of Proposed Strategies

1. **Restricted sales of precursor chemicals**: This approach aligns with international best practices. However, implementation must be carefully balanced to avoid disrupting legitimate medical and industrial uses.
2. **Comprehensive Customs policies**: This proposal is crucial, especially given Nicaragua's position as a cross-shipment point. Enhanced testing and documentation requirements could significantly impede trafficking.
3. **Instant substance recognition technology**: This innovative approach could revolutionize border control efforts. Investing in such technology could provide rapid, accurate identification of synthetic drugs.
4. **K9 Units**: While effective, this method should be part of a broader, technology-enhanced strategy, given the evolving nature of synthetic drugs.

Additional Considerations

- **Harm Reduction**: Countries like Scotland have increased funding for improving standards in methadone prescribing[5]. Nicaragua could consider similar harm reduction strategies.
- **International Cooperation**: The rise of new synthetic opioids like nitazenes in Europe and Brazil highlights the need for global collaboration in monitoring drug trends[5].
- **Treatment Access**: The U.S. example shows that access to medication-assisted treatment remains inadequate, with only 11% of Americans with opioid use disorder receiving opioid substitution therapy in 2020[5]. Nicaragua should prioritize expanding treatment access.
- **Early Warning Systems**: Implementing systems to detect contaminated drug supplies and alert the population could mitigate overdose risks[5].

Conclusion

Nicaragua's proposed plan provides a solid foundation for addressing the synthetic drug crisis. By incorporating recent global trends and successful strategies from other nations, we can enhance its effectiveness. The recent decline in overdose deaths in the United States demonstrates that with sustained, multi-faceted efforts, progress is possible[7].

As we move forward, let us remain adaptable, prioritize evidence-based approaches, and maintain strong international cooperation. Together, we can work towards a world where synthetic drugs no longer pose such a deadly threat to our communities.

Answer from Perplexity: pplx.ai/share

Honorable Chairs and Fellow Delegates, the alliance for safe online pharmacies (ASOP) have warned, in a 2021 survey report that roughly 95% of all online pharmacies are operated illegally.

The biggest risk posed by illegal online pharmacies is counterfeit pills – particularly those that are laced with various illicit substances.

The delegation of Nicaragua stands against the processes of illegal online pharmacies, however it should be noted that like many nations, the regulations around pharmaceuticals and pharmacies are not updated to consider the extensive possibilities of online based pharmacies.

In order to resolve this issue, the delegation of Nicaragua suggests a plan of action including; web domain regulation and registration, targeting and shutting down payment methods used by illegal online pharmacies, and banning the shipping/transport to and from unverified online pharmacies.

The delegation of Nicaragua yields the floor back to the chairs.

Honorable Chairs, Distinguished Delegates,

The delegation of Nicaragua is honored to address the pressing issue of illegal online pharmacies. According to the 2021 survey report by the Alliance for Safe Online Pharmacies (ASOP), a staggering 95% of all online pharmacies are operated illegally. This concerning statistic highlights the scale of the problem and the urgent need for global action to protect public health and combat the dangers posed by counterfeit pharmaceuticals.

Key Issue

The most significant threat arising from illegal online pharmacies is the circulation of counterfeit pills, often laced with harmful or illicit substances. These counterfeit medications not only undermine the effectiveness of legitimate treatments but also endanger the lives of consumers who unknowingly ingest these dangerous substances. The delegation of Nicaragua recognizes the severity of this issue and is committed to ensuring the safety and well-being of its citizens and the international community.

Current Challenges

While the delegation of Nicaragua stands firmly against the operations of illegal online pharmacies, it is essential to acknowledge that, like many nations, the regulations governing pharmaceuticals and pharmacies are outdated and ill-equipped to address the growing complexity of online-based pharmaceutical sales. The lack of sufficient regulations and

oversight in the digital realm has created an environment where illegal online pharmacies can thrive unchecked.

Proposed Solutions

In light of these challenges, the delegation of Nicaragua proposes a comprehensive plan of action to combat illegal online pharmacies and protect global health:

1. **Web Domain Regulation and Registration**
   The delegation advocates for the establishment of international regulations that require all online pharmacies to be properly registered and regulated through official web domains. This will facilitate better tracking of online pharmacies and ensure that only those that comply with international standards are permitted to operate. A globally recognized domain registry will help prevent the proliferation of illicit pharmacies and provide a clear avenue for enforcement.

2. **Targeting and Shutting Down Payment Methods**
   The delegation urges member states to collaborate in identifying and shutting down the payment methods used by illegal online pharmacies. These methods are critical in enabling illicit transactions and must be closely monitored. By disabling these payment systems, we can disrupt the financial operations of illegal pharmacies and make it more difficult for them to function.

3. **Banning the Shipping/Transport of Pharmaceuticals from Unverified Pharmacies**
   The delegation calls for the implementation of a global ban on the shipping and transport of pharmaceuticals to and from unverified online pharmacies. This will prevent counterfeit and illegal medications from entering national markets and safeguard consumers from dangerous substances. By regulating the flow of pharmaceuticals across borders, we can ensure that only verified, legitimate pharmacies are allowed to distribute medications.

Conclusion

The delegation of Nicaragua is committed to the fight against illegal online pharmacies and recognizes the importance of international collaboration in addressing this global health crisis. By implementing measures such as web domain regulation, payment method monitoring, and banning the transport of pharmaceuticals from unverified sources, we can significantly reduce the threat posed by illegal online pharmacies. The delegation of Nicaragua stands ready to work with all member states in crafting a robust, effective solution to this critical issue.

The delegation of Nicaragua yields the floor back to the Chair.

Honorable Chairs and Fellow Delegates,

We are witnesses to the growing threat of synthetic drugs and illegal online pharmacies, of which the effects on public health and safety are severe and require immediate intervention.

In 2022, the US reported over 100,000 deaths due to synthetic substances. The UNODC revealed that around 500 new synthetic substances are discovered each day. Meanwhile, the majority of online pharmacies being operated illegally cause an increased risk of purchasing counterfeit pills containing lethal chemicals.

The delegation of Nicaragua stands against the production, sales, and distribution of synthetic drugs, and the illegal operation of online pharmacies. Without strong, widespread intervention, these crises will continue to escalate, causing everlasting damage to our society.

Therefore, Nicaragua proposes a comprehensive plan focused on law enforcement, international cooperation, and digital moderation. This includes restricting the sales of precursor chemicals and stationing K9 units in high-risk regions. Additionally, Nicaragua calls for stricter web domain regulation and the targeting and shutting down of illegal payment channels.

With the UNODC's cooperation, we can establish lasting solutions to regulate synthetic substances and protect everyone.

The delegation of Nicaragua yields the floor back to the chairs.
